

Features & Options

BA/LI3620

The BA/LI3620 Lithium Ion AA battery is the ideal replacement for all BAPI 418 MHz wireless transmitters (except the BAPI-Slim and Wireless Food Probe). Each transmitter takes two batteries, giving the unit a battery life of 8 years.

BA/LI3620

(for all BAPI Wireless Transmitters except BAPI-Slim and the Wireless Food Probe)

BA/BAT-5AA

The BA/BAT-5AA Lithium battery is the ideal replacement for the BAPI-Slim 418 MHz wireless transmitter. Each transmitter takes one battery, giving the unit a battery life of 4 years.

BA/BAT-5AA (for BAPI-Slim Transmitter)

BA/BAT-5AA-HIT

The BA/BAT-5AA-HIT High Temperature Lithium 1/2AA battery is the ideal replacement for the BAPI 418 MHz Wireless Food Probe transmitter. Each probe takes one battery, giving the unit a battery life of 4 years.

BA/BAT-5AA-HIT (for Wireless Food Probe)

Ordering Information

Part Number	Description
BA/LI3620	Lithium Ion AA Battery, 3.6V, for all BAPI 418 MHz Wireless Transmitters except the BAPI-Slim and the Wireless Food Probe
BA/BAT-5AA	Lithium 1/2AA Battery, 3.6V, for the BAPI-Slim 418 MHz Transmitter
BA/BAT-5AA-HIT	Lithium 1/2AA Battery, 3.6V, for the Food Probe 418 MHz Transmitter

Specifications

BA/LI3620 Battery

Type & Size: Lithium Ion, AA
Nominal Voltage: 3.6V
Nominal Capacity: 2.25 Ah @2mA, to 2V
Operation Temp:
 -76 to 185°F (-60 to 85°C)
 0 to 95 %RH Non-Condensing
Agency: RoHS

BA/BAT-5AA Battery

Type & Size: Lithium, 1/2AA
Nominal Voltage: 3.6V
Nominal Capacity: 1.2 Ah @ 1mA, to 2.0V
Operating Temp:
 -67 to 185°F (-55 to 85°C)
 0 to 95 %RH Non-Condensing
Agency: RoHS

BA/BAT-5AA-HIT Battery

Type & Size: Lithium (High Temp), 1/2AA
Nominal Voltage: 3.6V
Nominal Capacity: 0.9 Ah @ 1mA, to 2V
Operating Temp:
 -67 to 257°F (-55 to 125°C)
 0 to 95 %RH Non-Condensing
Agency: RoHS
